

# Gateway to Success

## MAJOR UTILITIES PROVIDER

When one of the UK'S leading utilities companies embarked on a program of automated gate replacement, they chose CTAC as their preferred supplier and installer.

The installations over multiple sites called for Expamet In filled Security Gates linked to fully networked Access Control allowing single card access. The gates are in a range of sizes and finishes to meet the aesthetic requirements of the surrounding area. All running gear is supplied by CAME (UK) Ltd and offers full battery back up for continued use if power outages occur.

Each installation is different and CTAC control the process from design, manufacture and fitting using our own skilled personnel. Each gate is bristling with the following safety devices as standard:

- Safety Ground Loops
- Safety Beams
- Anti Crush Safety Edge
- Warning Beacon

Installations will be continuing for the following two years on both physical gates and access control throughout the Midlands.
